Product Details

Specifications: Includes chrome waste & overflow combination
195 litres capacity

Squaro is made from QUARYL which is composed of a fusion of acrylic with quartz filling. This synthetic material is a solid colour throughout that allows a realisation of shapes, lines & designs previously thought impossible.

Product Code: BQ170SQR

For example this special material allows much steeper bath walls, meaning that even with modest outside dimensions, there is still room to stretch out inside.

QUARYL has the benefits of sound-deadening & anti-slip features. It is also dimensionally stable with a uniformity of material that ensures a solid, brilliantly glossy surface, pleasant, solid & warm to touch.
